International Women's Day

Thanking the Almighty for Women's Development

Dear God,

*We thank you for the unprecedented development in the field of education
for girls and women all over the world.*

*We would also like to give you thanks as very few women today face death
or complications in childbirth.*

*It is indeed your blessings that we can find women of such great courage
and initiative around us.*

*Thanks to you and women's efforts that they are not only emerging as
entrepreneurs but also having a greater say over the way money are being
utilized within their houses.*

*Lord of love and hope, we also know how many girls and women still have to
face challenges in society today so that they get an equal say in their
household decision-making or community.*

*We pray to you that life changes for all these women and they live with men,
girls, and boys together as equals.*

Amen.
